Abstract (en)
[origin: WO2014209386A1] Examples of a computing device for attaching to a host computing device are disclosed. In one example implementation according to aspects of the present disclosure, a computing device may include one or more processors, a memory, and a connection port to attach the computing device to a host computing device. Additionally, the computing device may include a driver installation module to cause a device driver to be installed on the host computing device to enable the computing device to send data to and receive data from the host computing device. The computing device may also include an operating system session module to initiate an operating system session on the computing device and to cause the operating system session to be accessible to a user of the host computing device via a web browser interface on the host computing device.
