Abstract (en)

A powder detector (10;201) to detect an amount of powder in a powder container (112; 200) includes a vibration plate (201) disposed in the powder container (112; 200) to vibrate, a contact member (112c; 205) to vibrate the vibration plate (201); and a vibration detector (10) to detect a vibration state of the vibration plate (201). The powder has flowability, and the vibration state of the vibration plate (201) is affected by the powder in the powder container (112; 200).
