Abstract (en)

[origin: WO2016008476A1] The invention relates to a shelf element (1; 1') for a shelf (200) of a rack, in particular a sliding rack, comprising an elongate main body (2) and a material segment (3) that is arranged on the main body (2) in such a way that an insertion holder (4) for a functional part (290) and/or for an information carrier (310) is formed, which insertion holder is open in the direction of a longitudinal side of the main body (2). According to the invention, the shelf element (1; 1') is an extruded part and the insertion holder (4) is formed by extrusion. The invention further relates to an extrusion die. Furthermore, the invention relates to a shelf frame (100), a shelf (200), and a rack, in particular a sliding rack.
