Abstract (en)
[origin: GB2515911A] A towel T dispenser 1 for dispensing from a first roll 3 and collecting on a second roll 5. The towel dispenser 1 has a housing 17 for receiving the first roll and a cover 21. A mounting member 23 is provided at the back of housing for mounting towel dispenser 1. A first roll is positioned within the housing to rotate about a first longitudinal axis X1 extending from the back of the housing to the front of the housing. A second roll is positioned within the housing to rotate about a second longitudinal axis X2 extending from the back of the housing to the front of the housing. The first and second longitudinal axes are offset from each other in a transverse or horizontal direction. A second embodiment has first and second chambers to receive first and second rolls, and a cover 21 comprising a transparent or semi-transparent section. A third embodiment has first (73 fig 8A) and second (75 fig 8A) drive mechanisms with drive rollers rotatable about a first longitudinal axis extending from the back of the housing to the front of the housing.
