Abstract (en)

[origin: WO2014155370A1] The current invention concerns a kit comprising at least two types of formulations with a different composition, each formulation comprising: (i) one or more poly-unsaturated omega-3 fatty acids; and (II) one or more vitamins, minerals and/or essential amino acids; wherein each type of formulation is included in a separate container and wherein all types together are suitable for an entire human population. Additionally, the current invention provides a method for assembling such a kit.
