Abstract (en)  
[origin: WO2015000572A1] The invention relates to a drive device equipped with a drive shaft and a propeller which is arranged on said drive shaft. The propeller comprises a propeller hub connected to the drive shaft, and at least two propeller vanes that are detachably secured to said propeller hub. These are screwed to the propeller hub, proceeding from a propeller hub inner side which faces the drive shaft, using cap screws.
