Abstract (en)
[origin: WO2015001426A2] The invention relates to a security bag for transporting valuables, having an upper first layer and a lower second layer, each of which consists of a flat plastic material. A slot-shaped opening which can be closed by a closure device is formed in the first layer. The closure device comprises a closure strip and an adhesive layer arranged between the closure strip and the first layer. At least one indicator element is arranged on the lower second layer in the region of the closure device, said indicator element irreversibly indicating a drop in the surrounding temperature to a value below 0 °C and/or an exposure to moisture.
