Abstract (en)

[origin: WO2015001011A1] The present invention relates to a dispensing font device (1) comprising a vertical first part (2) having a first upper end (3) and a second lower end (4); a substantially horizontal second part (5) being in fluid communication with the first part (2), the second part (5) comprising a tapping handle (6) being adapted to open and close an outlet (7) of a dispensing line (8) extending through the font device (1) during use; the first part (2) comprising a first channel (9) extending from the second lower end (4) to the first upper end (3), and a guide channel (11) in which the dispensing line (8) is adapted to be guided, thereby extending through the guide channel, the guide channel (11) extending in the first part (2) from the first upper end (3) to at least the second lower end (4), and the guide channel (11) having an inner diameter (D); and a cooling unit (12) adapted to circulate a cooling medium inside the first and second parts (2, 5). Furthermore, the invention relates to a dispensing system (100) for dispensing a beverage.
