Abstract (en)
[origin: WO2015000880A1] The present invention relates to a beverage producing system for making hot or cold beverages available. Said system is based on a beverage dispenser (30; 30') which comprises an electromagnet (20; 20') and a control unit for controlling said electromagnet (20; 20'). The system further comprises a new disposable container for beverage ingredients, which comprises a magnetically actuated output device (10; 10'), the electromagnet releasing, when in the open position, the output device (10; 10') for a continuous flow of beverage ingredients from the reservoir through and from the output device (10; 10').
