Abstract (en)

[origin: WO2015000530A1] The present invention relates to a laundry treatment appliance (1) comprising a rotary drum (3) wherein the laundry to be treated is placed, an electric motor (12) rotating the rotary drum (3), a control interface for operating the laundry treatment appliance (1) and a door (4) allowing access into the drum (3) for loading or unloading laundry. The present invention more particularly relates to a laundry washing and drying appliance having a restarting control mechanism ensuring that the restarting operation is initiatable when the door (4) of the laundry treatment appliance is closed.
