Abstract (en)
[origin: DE102013011209B3] The pump has a pump housing (1) that comprises a slide valve with uniformly distributed guide rods, is arranged parallel to a pump shaft. A return spring is arranged between a spring contact plate and a spring clamping plate in a hydraulic chamber. A control valve (31) is provided between a control channel and a return channel. A solenoid coil is arranged adjacent a magnetic working chamber in the hydraulic chamber. A piston rod is connected with a permanent magnet, and linearly moved with respect to the solenoid coil.
