Abstract (en)

[origin: WO2015000126A1] Devices, methods, and systems for enriching building information modeling data are described herein. One method includes providing a first selectable building domain via a graphical user interface, wherein the first selectable building domain includes a first layer template and a first plurality of selectable device templates, and providing a second selectable building domain via the graphical user interface, wherein the second selectable building domain includes a second layer template and a second plurality of selectable device templates.
