Abstract (en)

[origin: WO2015000614A1] The invention relates to a percussion, wind and rattling instrument (1) with a hollow body (5). The body (5) has a striking surface (4). A sound element is arranged within the body (5). The body (5) has two sound holes (2, 3). At least one sound hole (2, 3) has a diameter between 2 cm and 6 cm, preferably between 2.5 cm and 4.5 cm and particularly preferably between 3 cm and 4 cm. The invention also relates to a musical-instrument arrangement having at least two percussion, wind and rattling instruments (1). The percussion, wind and rattling instruments (1) are arranged adjacent to one another. In each case two sound holes (2, 3) of percussion, wind and rattling instruments (1) arranged adjacent to one another border one another and form a sound channel.
