Abstract (en)

[origin: WO2015000994A1] The invention relates to an electric device for heating a fluid for a motor vehicle, comprising: - at least one heating module (3) comprising a metal heating body (7) having at least one electric heating means (17) made in the form of a heating track (17) on a surface (15) of the heating body (7), and - control means (5) for said heating module (3) comprising electronic and/or electrical components. According to the invention, at least one electronic and/or electrical component (19) of the control means (5) is arranged on the surface (15) of the heating body (7) having the heating track (17), in electrical contact with the heating track (17). The invention also relates to a heating and/or air conditioning apparatus comprising such a device.
