Abstract (en)

A device for supporting reels of webs with self-adhesive labels for labelling machines comprising a supporting structure (5) and at least two supports (6) each for supporting a reel of web with self-adhesive labels fixed on one side of it; the supports (6) being rotatably mounted or mountable on the supporting structure (5), one at a first position and one at a second position; the positions of the two supports (6) being invertible, and a support (6) positioned in the second position being movable to the first position, in use, allowing, during the entire movement, unwinding of a web from a reel (14) mounted on it and feeding to a labelling machine.
