Abstract (en)

[origin: WO2015006667A1] This invention is related to granule formulations of a molecular complex comprising a volatile compound, where no adjuvant/binder is required in such granule formulations. In addition, it is surprising that use of molecular sieve destabilizes the granule formulations provided herein, thus no molecular sieve is required. Provided are methods for preparing granule formulations of a molecular complex comprising a volatile compound, and compositions comprising such granule formulations. In addition, methods of treating plant or plant parts using compositions disclosed herein are also provided.
