Abstract (en)
[origin: WO2015004380A1] The invention relates to a portable refillable cream dispenser, positioning device and applicator 1, which comprises a first body/actuation/dispensing-deposition-application assembly 2, having a first body 10, a dispensing-deposition-application head 16 slidably mounted in the first body 10 between a proximal position and a distal position, with a passage 17 having an upstream seat 18 and a downstream dispensing-deposition-application means 8, an actuation means 9 mounted so as to be able to move with respect to the first body 10 between a proximal position and a distal position, a resilient means 21 capable of urging the dispensing-deposition-application head 16 and the actuation means 9, toward the proximal position thereof, and capable of being compressed when same are in the distal position thereof; and a second body/refill assembly 3 including a second body 7, a refill 4 with a reservoir 5 and a means 6 having a pump 6a and an actuation tube 19; the first body/actuation/dispensing-deposition-application assembly 2 and the second body 7 including additional rigid and detachable connecting devices 33, the dispensing-deposition-application head 16 and the actuation tube 19 including a seat 18 and a connecting end-portion 19a, respectively, which are capable of being connected with one another by means of the insertion of sealing means 34 and separated from one another upon the connection and separation, respectively, of the two assemblies.
