Abstract (en)
[origin: WO2015004170A1] The invention relates to a transport rack (32) and to a method for producing a transport rack for goods, transport containers or the like, wherein the transport rack is formed from at least two transport rack units (33), wherein the transport racks are in each case formed of a carrying unit (34) and a foot unit (35), wherein the carrying unit forms a transport plane having at least one support surface (65) for the arrangement of goods on the transport rack, and wherein the foot unit is designed for supporting the transport rack on an installation surface, wherein the carrying unit and the foot unit each consist of at least one profile element (16), wherein the profile elements are made of cardboard, wherein all profile elements are formed by a cardboard tube (10), wherein the cardboard tube is preferably formed of wound and/or adhered multi-layer (recycled) paper, wherein the profile elements are formed by cutting off and/or chamfering of tubular surface portions (15) of the cardboard tube.
