Abstract (en)

[origin: WO2015003888A1] The invention relates to a device for removing coverings laid on flat surfaces, having a drive unit (10) comprising a pair of drive wheels (12) and a first drive motor (14) for driving the drive wheels (12), and having a motor-driven impact unit (20) comprising a cutting knife (22) and a second drive motor (24), wherein the drive unit (10) and the impact unit (20) have an articulated connection (30), which is formed in such a way that the drive unit (10) and the impact unit (20) are rotatably mounted relative to each other.
