Abstract (en)
[origin: CA2916797A1] The invention relates to a plug connector (1) having a housing and at least one contact element (4) which is fixed within the housing and is designed for connection to a wire of a cable (2), which wire is partially surrounded by a jacket, wherein the housing comprises two housing parts (6, 7) which are designed in such a way that they are fitted to one another in order to assemble the plug connector (1) and are connected by being moved in the longitudinal direction of the plug connector (1) until they reach an end position, wherein, owing to the movement, a part of at least of one of the housing parts (6, 7), which part is provided for receiving a portion of the jacket (12), is radially deformed in order to fix the jacket (12).
