Abstract (en)

Assembly for forming a coating application device configured to spray a coating material onto a surface to be sprayed (S) with a coating material, said assembly comprising: a base part configured to cause or assist displacements of the coating application device with respect to a surface to be sprayed (S), a spraying unit configured to release coating spray; and a protecting unit configured to be fixedly or removably connected with said base part and to protect coating spray against wind, wherein the protecting unit is at least partially dome-shaped.
