Abstract (en)

The present invention refers to a process and a plant for producing panels made from waste paper, comprising the steps of forming an incoherent mass (M) containing particles of waste paper, depositing the incoherent mass (M) onto a support (13) so as to form a layer (S) of substantially uniform thickness (S1) and applying a pressure to such a layer (S), wherein a first liquid (L1) is sprayed onto or into the incoherent mass (M) during the deposition step before the formation of the layer (S).
