Abstract (en)

Operating apparatus (10) for a sliding door comprising: - a frame (11) fixable to a vertical support (12), - support means (13) connected to said frame (11) and suitable to support at least one leaf (14) of the sliding door to said frame (11) and to slide said shutter (14) along said frame (11) according to a opening/closing direction (A); - a casing (15) fixable to said frame (11) and adapted to cover said support means (13); - lighting means (16) fixed to said frame (11) and configured such that in a condition of use, in which said frame (11) is fixed to a vertical wall, said lighting means (16) are activated to project at least one light radiation that is projected on said vertical wall in a direction which is substantially parallel to the latter.
