Abstract (en)
[origin: ES2569424A1] The invention relates to a gas cooking point (3) with a gas valve (5), with a control element (11) for actuating the gas valve (5) connected in a torsion-resistant manner to an axis of actuation (10) of the gas valve (5), and with a sealing device (12) which is arranged between the control element (11) and a cover element (8) of the gas cooking point (3), wherein the sealing device (12) comprises a first sealing element (15) which is connected to the cover element (8) and a second sealing element (16) which is connected to the control element (11), where the first sealing element (15) is plugged into the second sealing element (16), and where the second sealing element (16) moves relative to the first sealing element (15) when the control element (11) is turned.
