Abstract (en)

[origin: MX2015015368A] A cable includes a connector and a lead. The lead has wires and a shield. The shield is folded over at one end of the lead so that, in a section, a first layer of the shield and a second layer of the shield are disposed at a radial offset to each other. A first crimped sleeve disposed in the section between the first layer and second layers of the shield. A second crimped sleeve disposed in the section radially outwardly with respect to the first and second layers of the shield.
