Abstract (en)

[origin: WO2015009262A2] The present invention is related to a bench (1) that comprises sitting section (11), backrest (10), leg (13) to which said sections (10, 11) are connected, and a space (12), which prevents the hand from being pressed between the backrest (10) and sitting section (11), or another dangerous situation while said sitting section (11) is being closed automatically, by means of a member slowing down the closing (1330), which is placed on the section of the resistant leg (13) connected to the ground, to which the seat is connected (133).
