Abstract (en)

[origin: WO2015009796A1] A composition designed for application to a mucosa comprises a tonicity-adjusting agent, a methylcellulose, and a liquid diluent, wherein the methylcellulose has anhydroglucoside units joined by 1-4 linkages wherein hydroxy groups of anhydroglucoside units are substituted with methyl groups such that s23/s26 is 0.36 or less, wherein s23 is the molar fraction of anhydroglucoside units wherein only the two hydroxy groups in the 2- and 3-positions of the anhydroglucoside unit are substituted with methyl groups and wherein s26 is the molar fraction of anhydroglucoside units wherein only the two hydroxy groups in the 2- and 6-positions of the anhydroglucoside unit are substituted with methyl groups.
