Abstract (en)
[origin: WO2015007648A1] The invention relates to a razor and a method for producing a razor. In order to provide an improved razor, a razor (1) has a handle (10), at one end of which a ball joint socket (11) is arranged, and a blade head (20) having at least one razor blade (21) and a ball joint head (22). The ball joint head of the blade head and the ball joint socket of the handle form a ball joint, and the handle has an alignment element (14) in the ball joint socket that is designed to engage with a recess (36) in the ball joint head.
