Abstract (en)
[origin: WO2015008217A2] The invention involves creating lottery tickets of which the possible prize will be discovered by the holder of same via a Smartphone application which, depending on the image on the ticket, will make it possible to reach, on a remote computer site, the equivalent of a draw, that is preferably pre-recorded or pre-defined and will be displayed on the Smartphone in a form equivalent to a video, thus making it possible for the holder to be able to follow and experience the draw and thus find out if he has won and, in this case, what the prize is. The distribution of the prizes, the guarantee that the draw is unique and the "new" nature of the tickets are guaranteed and managed by the remote computer system. The invention makes it possible, in particular, to bring a novel appeal to lotteries based on scratchcard tickets, which are the main key to the success of this kind of lottery.
