Abstract (en)
A method for manufacturing smoking articles (8) is provided wherein glue is applied to a web of wrapping material (1), said web of wrapping material comprising a plurality of segments for receiving glue, each segment corresponding to a respective portion of wrapping material in which an individual smoking article is to be wrapped. At least three glue free regions (2) are formed on a first surface of each region, said glue free regions having a combined surface area of at least 45% of the first surface, glue being applied to the remainder of the first surface.
