Abstract (en)

The present invention refers to an element (10, 110) for swimming pool grids (100). Said element (10, 110) is adapted to be connected to other elements in order to obtain a swimming pool grid (100), said swimming pool grids (100) being adapted to define a walking surface. Said element (10, 110) comprising: - a main body (11) which is developed along a first line (L1) and which defines a first plane (P1) corresponding to the walking surface of the grids (100); - at least one tooth (12) which protrudes from the main body (11) and is developed on the first plane (P1); - a connector (24) which is connected to the main body (11) and is adapted to removably connect the element (10, 110) to other elements (10, 110). Besides, the present invention refers to a swimming pool grid (100) comprising one or more of the elements (10, 110) according to the invention.
