Abstract (en)

A roller screen device including a fixed vertical roller-box (12) with a winding roller (26) inside, and a track (20). When the screen is opened by moving a mobile profile (17) the tracks (20) pass out of the mobile profile (17) onto a guided floor strip (27) a few millimetres in height, when the mobile profile (17) is moved towards the fixed roller-box (12) the tracks re-enter into the mobile profile (17), making the tracks (20) concealed. The device according to the invention enables easy access for wheelchairs and pushchairs.
