Abstract (en)

[origin: WO2015010142A1] The invention relates to a method for fastening at least one precious stone (3) to a case (1) made of meltable material, wherein the case (1) has at least one hole (2), in which the precious stone (3) is arranged, wherein the precious stone (3) touches the case (1) at at least one point (6), wherein the precious stone (3) is heated by a heat source (7) until the case (1) goes into an at least partially melted state in the region of the contact point (6), such that a rigid connection between the precious stone (3) and the case (1) can be established by means of cooling.
