Abstract (en)

[origin: WO2015011340A1] The invention relates to a covering structure configured to be placed in the vicinity of a bowling lane for covering at least a gutter of the bowling lane in a covering position, wherein the covering structure comprises at least one covering sheet, and wherein in the covering position the covering sheet is arranged above the gutter so that the cover structure and the bowling lane are configured to form a flat surface. The invention further relates to a bowling lane conversion system for a bowling center.
