Abstract (en)
[origin: WO2015010675A1] The present invention relates to a device (20) for machining workpieces (6), said device having a machining tool (2), a first workpiece-guiding element (1) and a second workpiece-guiding element (5), said first workpiece-guiding element (1) and said second workpiece-guiding element (5) being designed to guide a workpiece (6), in a defined way, relative to the machining tool (2), the machining tool (2) having an axis of rotation (21) and a co-axial opening (22), the machining tool (2) rotating about the axis of rotation (21) for machining the workpiece, and the first workpiece-guiding element (1) being arranged in the opening (22) of the machining tool (2) co-axially to the axis of rotation (21).
