Abstract (en)  
[origin: WO2015011296A2] The present invention relates to a method for processing geolocation data, including the implementation, by means (21) for processing data from a server (2), of the steps of: (a) transmitting a geolocation request to a mobile terminal including geolocation means; (b) receiving geolocation data from the mobile terminal (1a, 1b); (c) associating said geolocation data with a unique identifier, itself associated with the mobile terminal (1a, 1b), in a database stored in data storage means (22); (d) receiving a geolocation request transmitted by an application server (3a, 3b), the request including said unique identifier associated with the mobile terminal (1a, 1b); (e) generating and sending, to the application server (3a, 3b), a response to the request depending on the geolocation data associated with the unique identifier in said data base, and on the rules associated with the application server (3a, 3b).
