Abstract (en)
Security box that is ready to assemble and can be embedded within a structure. A security box (11) that can be embedded within a structure (10) constructed with a mouldable material (12) such as concrete which acquires strength after a given period of time. The security box (11) comprises a storage body (13) and an access conduit (15), to insert/remove items into/from the storage body (13), that are intended to be built into the structure (10) and be embedded within said mouldable material (12). The storage body (13) consists of several parts configured in such a way that it can be built in-situ by joining said parts using the appropriate means of connection.
