Abstract (en)
[origin: US2016181721A1] A connector plug for insertion into a socket. The connector plug having a multipart housing comprising a front part and a rear part. The front part and the rear part are affixed to each other by means of being screwed together by a thread. The front part and the rear part a groove is formed respectively. The two grooves extend in axial direction at the outer circumference of the front part and the rear part and are aligned relative to each other when the front part and the rear part are screwed together completely. A slider can be housed by an adapter at the front part or the rear part whereby the slider has a crosspiece that engages with the groove and when the front part and the rear part are screwed together completely it can be displaced into a locked position.
