Abstract (en)

[origin: WO2015015127A2] A method for injecting a product as part of an aesthetic intervention. The invention concerns a method for injecting a product as part of an aesthetic intervention, said method including the following successive steps of: - piercing an area of the skin of a patient by means of a needle (1) having a sharp distal end (1a), said needle comprising a bore that extends between an upstream opening and a downstream opening that opens at said distal end; - inserting, into said bore, via said upstream opening, an injection cannula (3) that has at least one injection port (4); - sliding said injection cannula beyond the distal end (1a) until the injection port (4) opens into an area to be treated located under the skin; - injecting the product into said area to be treated via the injection cannula (3).
