Abstract (en)
[origin: WO2015014598A1] The invention relates to a vehicle body, comprising a first body component made of fiber-reinforced plastic and a second body component made of fiber-reinforced plastic, which are adhesively bonded to each other by means of an adhesive layer and are subjected to shearing load and/or tensile load in a main loading plane, wherein the adhesive layer is shaped by means of an adhesive flange, on which the adhesive layer is oriented at a slant to the main loading plane at an angle between 30° and 60°.
