Abstract (en)
[origin: WO2015014986A1] The invention relates to a lubricant composition comprising at least one base oil, at least one compound comprising a dithiocarbamate group, at least one compound comprising a phosphite group, at least one compound comprising a dithiophosphate group, and at least one compound comprising a thiadiazole group. Said lubricant composition simultaneously has good anti-wear and extreme pressure properties, a low friction coefficient and good anti-seizure properties. The lubricant composition can be used for the lubrication of transmissions such as gearboxes, bridges, preferably manual gearboxes of motor vehicles.
