Abstract (en)
[origin: WO2015014344A1] The invention relates to a motor vehicle door equipped with a motor vehicle door lock (1) and an associated closing bolt (7). The invention also relates to a stop device (3) with a corresponding damping element (15). Said stop device (3) interacts at least with the relevant locking bolts (7) for the damping movement thereof, in locking bolts (7) introduced into the motor vehicle door lock (1). According to the invention, the stop device (3) is designed as a damping module (3) arranged between the motor vehicle door lock (1) and a door skin (T).
