Abstract (en)  
[origin: WO2015015355A1] The present invention relates to a refrigerator door and a refrigerator. A refrigerator door (1) includes an end cover (4) and a door panel (3) made of a metal sheet, where a top surface of the end cover (4) includes an inclined surface portion (42) that inclines downwards in a direction from the rear to the front, and the door panel (3) includes a front panel (31). According to the recommendations of the present invention, the door panel (3) includes a front flange (34) which is bent backwards from the front panel (31) and is connected to the end cover (4), an included angle ( $\beta$ ) between the front flange (34) and the front panel is greater than 90 degrees, and the front flange (34) is located in parallel with and under the inclined surface portion (42).
