Abstract (en)

[origin: WO2015014649A1] The invention relates to a terminal (100) for connecting a conductor (126) in an electrically contacting manner to a current bar (110) accommodated on a retainer (108), wherein an actuating lever (103) and a clamping spring (101) are provided. A slotted guide (114) is provided, which comprises a closing slot (104) and a clamping slot (105) branching off transversely from the closing slot. The actuating lever (103) is movably guided in the slotted guide (114) by means of a first pin (130) and a second pin (131).
