Abstract (en)

[origin: WO2015014591A1] The present invention relates to a contact element for electrically connecting electrical connection elements in an externally routed bus system, more particularly comprising busbars and/or plug connectors, and having at least three receptacle elements for receiving the electrical connection elements. The present invention also relates to a plug arrangement comprising a contact element of the type described, and to an electrical device, more particularly a series module, comprising an electrical sub-assembly and a plug arrangement of the type described.
