Abstract (en)

[origin: CN105672816A] The invention relates to a fitting with an adjustable clamping area. Fitting (1) with a lock function part (7), in particular to a lock insert (7.1) or lock box or strike plate, is provided with a clamping region (2) for a door element, in particular for a glass door element; the fitting includes a first fitting element (3) and a second fitting element (4) each of the fitting elements at least locally has a contact section (6.1) comprising an intermediate layer (5) contactable with the door element, wherein the fitting elements (3, 4) limit the clamping region (2); the lock function part (7) has a third fitting member (8) arranged between the fitting elements (3, 4). Essential to the invention is provided that between the fitting elements (3, 4) is provided an adjustment mechanism with which the position alignment of the lock function part (7) is executable.
