Abstract (en)
[origin: ES2573003A1] Cooking field device. The invention relates to a cooking field device, in particular, to an induction cooking field device, with one or more support units (12) which are designed to support one or more electronic units (14) in an outer casing (18). In order to provide a generic cooking field device that is advantageously not very complex, it is proposed that the support unit (12) has one or more cable housing units (20) that are intended to house one or more cables.
