Abstract (en)
[origin: WO2015018633A1] The invention relates to a method for flushing containers (2, 102) with a flushing gas prior to filling said containers using a treatment head (1, 1a, 104), on which the respective container is arranged in a sealed manner during the flushing process and via which the flushing gas is introduced into the container and the flushing gas and a gaseous and/or vaporous medium that is displaced by the flushing gas, for example air, is discharged from the container. The container is evacuated or the vacuum of a vacuum source (19, 130) is applied to the container prior to introducing the flushing gas.
