Abstract (en)
[origin: WO2015019287A1] The invention relates to a manufactured product entirely or partially obtainable from a semi-finished product made from an elastomeric polyurethane resin, wherein the resin is obtained from the reaction of a formulated polyol and a prepolymer isocyanate, in the presence of a catalyst. The manufactured product of the invention is a fashion article, a clothing article or accessory, a design article, a household and furnishing article, a leatherware and luggage article, or an architectural finishing surface, like wall and floor coverings. In particular, the manufactured product of the invention is a bag entirely obtained from a semi-finished product made of an elastomeric polyurethane resin or obtained by combining, by sewing and/or gluing, the semi-finished product with another material, or obtained by combining, by sewing and/or gluing, the semi-finished product with another semi-finished product made of an elastomeric polyurethane resin having the same formulation.
