Abstract (en)  
The present invention relates to a combing device (1) for combing hair, the device (1) comprising, a container (2), a plurality of teeth (5) and a triboelectric generator (7). The container (2) is suitable for housing some content (11), the container (2) comprising holes (3) arranged in a brushing zone (4) of the container (2). The plurality of teeth (5) are attached to the brushing zone (4) of the container (2). The shaking means (6) are suitable for causing a movement in the interior of the container (2), and the triboelectric generator (7) is adapted for creating a triboelectric effect on the hair to be combed.
